Profile

Analytical Insight, Adaptive, Creative Problem Solving, Leadership, Diverse Field Engagement

An ambitious and adaptive student, deeply immersed in the evolving field of Artificial Intelligence. With a proven track record in Saudi Aramco and national arenas like the Robotics Olympiad competition, I demonstrate a high level of adequacy and innovative thinking. Achieving First Honors and securing excellence awards for four consecutive years further illustrates my commitment to achieving high standards. Apart from academic advancements, I have dived into the domain of retail gold selling, which consequently strengthened my communication skills and ability to negotiate.

Education

2020 - 2025 **Bachelor of Science / Computer Science (First Honor)**
King Abdulaziz University (KAU) Jeddah / KSA | GPA: 4.76 / 5

2017 - 2020 **American High School Diploma**
Al Andalus International School (AIS) Jeddah / KSA | GPA: 3.88 / 4

Professional Experience

Data Scientist Intern

Saudi Aramco

June 2024 – Aug 2024
Dhahran / KSA

Responsible for serving as a crucial mediator between business and development teams under Aramco.ai, ensuring technical requirements are understood, gathered, and delivered. Utilizing agile methodology and scrum framework, I was responsible for leading design sprints to gather information and clarify needs, translating them into actionable plans. By collaborating closely with the development team, I ensure the final product meets exceptional standards.

Gold Retail Sales

Mazhar for Gold and Jewelry Company

May 2018 – June 2018
Jeddah / KSA

Responsible for negotiating, selling, and buying gold with a focus on maximizing sales value. Additionally, upon engaging with customers, I maintained strong situational awareness to prevent theft in the store. I closed numerous high-value deals, often worth thousands of dollars. Furthermore, I monitored the gold prices to make informed pricing decisions.
